EDUCATION

G. L. Bajaj Institute of Technology & Management

Master of Computer Application

Chaudhary Charan Singh University

Bachelor of Computer Application

Greater Noida, Uttar Pradesh

10/2021 - 09/2023

Meerut, Uttar Pradesh

05/2018 - 09/2021

TECHNICAL SKILLS

Programming Languages: C#, C, C++, Java, JavaScript, SQL

Game Development Tools: Unity 2D/3D, Photon Fusion, Ready Player Me

Cloud and DevOps: AWS S3, PlayFab, Firebase, Google Cloud Console, Git, Github

Virtual and Augmented Reality: Meta All-in-One SDK, Virtual Reality, Augmented Reality, Spatial Anchors

WORK EXPERIENCE

Unity Developer

June/2023 - Present

IXR Labs, Gurugram, India

- Developed the **Grand Prix multiplayer racing game**, optimizing **game mechanics**, **physics**, and implementing **Photon Fusion** for seamless multiplayer networking. Integrated **Ready Player Me** for customizable avatar creation, enhancing user experience.
- Developed the **Engineer Marvels mixed reality game**, allowing players to interactively assemble engineering model parts. Leveraged **AWS S3** for **Addressables** to improve AR/VR integration and player module interaction.
- Worked on the **CongiHab VR rehab app**, focusing on developing immersive rehabilitation games for therapy.
- Collaborated closely with designers and developers, integrating **PlayFab** and **Firebase** for data management, **player authentication**, and analytics, while using **Git** for version control and project management.

PROJECTS

Engineering Marvels - VR Quest App (Android)

- Technologies Used:** Unity, C#, Photon Fusion, Meta SDK, Addressable, PlayFab, Spatial Anchors, AWS S3.
- Educational VR app for assembling engineering modules in mixed reality environments using Meta Quest devices.
- Implemented **multiplayer functionality with Photon Fusion**, enabling multiple users to interact in shared spaces.
- Optimized asset management with **Unity Addressable** for better performance and reduced memory usage.
- Utilized **PlayFab** for **cloud-based saving/loading** to ensure seamless user progress storage and optimized asset management with **Unity Addressables** for enhanced performance and reduced memory usage.
- Integrated **shared spatial anchors** for collaborative interactions in both physical and virtual environments.
- Successfully delivered **alpha version** in collaboration with **Meta** after multiple iterations.

Slot Machine Game (Windows)

- Technologies Used:** Unity, C#
- Created a Unity-based slot machine game featuring wild symbols, scatter mechanics, free spins, and **bet adjustment** logic using **C#** scripting.
- Implemented win logic with multiplier calculations, symbol matching conditions, and scatter-triggered bonuses.
- Developed a **dynamic betting** system with balance checks, **game state management**, and responsive UI controls.
- Optimized performance** and polished user experience with **animated reel spinning**, **interactive UI**, and real-time balance updates.

INTERESTS

- 2D / 3D Multiplayer Game Development, VR Development
- Web Development, Gaming, Photography

EXTRACURRICULAR ACTIVITIES

- Team Leader** - Institution's Innovation Council (IIC) Cell, G. L. Bajaj Dec 2021 - Sep 2023
- Technical Wing Coordinator** - Dream Spark Aura (DSA) Club, G. L. Bajaj Jan 2022 - Sep 2023
